

DC6V~90V Motor Speed Adjustment Switch/ Speed Governor

Feature:

- Model: 0044002
- Voltage: DC 6V~90V
- Rated current: 8A
- The maximum operating current: 15A
- Unit Size: 64mm x 59mm x 28mm
- Speed Adjustment Range: 0%~100%.
- Adjustable potentiometer: 10K
- The speed of motor rotation can be adjusted according to 0~100% through twisting the “Adjustable potentiometer”.
- With 15A fuse

Usage:

- Connect DC power wire to the terminals “Input”. Connect the DC motor to the terminals “Output”.
- Twist the “Adjustable potentiometer”, adjust the speed of motor rotation. Twist clockwise, motor rotation will speed up; Twist anti-clockwise, motor rotation will slow down.
